APS is a solutions driven company simply because each of our merchants deserves cash management and credit card technology tailored to unique business needs and opportunities.

Our goal is to take the merchant arena to another level. Up until now there has been an on going battle and tug of war between iso's, banks and other msp's (merchant service providers) for the merchant processing market back and forth, back and forth looking for better rates, better customer service etc.

About Us

Opportunities

Financial Literacy is the ability to read the stories that numbers tell. Being financially literate is not something most of our parents taught us, nor did our schools.

The [National Council on Economic Education](#), in a recent study of over 1000 adults and 1000 high school students revealed a shocking lack of comprehension of even the most basic economic principles.

- Over 49% of the adults and 66% of the high school students received failing grades.
- Only 6% and 3% respectively received A's and the most frightening aspect was that the material covered consisted of simple questions about inflation and supply and demand

In other words, issues which directly effect each of us every day! No complex economic concepts were addressed at all! To view this study yourself, please access the following website.

Click here to take the test yourself.
You may be surprised at the results!
<http://www.ncee.net/cel/results.html>

As an adult, being **financially literate** is a CHOICE, just like any other choice you make in life and the worlds that literacy opens up are limitless!

Communities On The Web was created to enable neighbors in a community to communicate with each other.

These days it is sometimes quite difficult to keep up with the day to day news, activities and events going on in and around our neighborhood. **Communities On The Web** provides a forum whereby neighbors in a community can keep in touch, stay informed and learn about those things that affect each other.

A **Communities On The Web** web site is provided at no cost to the community. The entire cost of maintaining and managing the site is provided by local business people who sponsor each community site on a month by month basis.

All that we ask is that when looking for products or services, you first consider those businesses that are sponsoring your **Community On The Web**.

Please spend a few minutes to browse our services and information, and then take some time to visit some of our current community members.

if you are interested in learning more about **Communities On The Web** please click on the 'Information' button and either send us an eMail, or fill out our request form.

If your are a homeowner who would like to join our community and start your own neighborhood site, then click on the 'Information' button and either send us an eMail, or fill out our request form.
